Overview

ePrincipal is a web based software system that is part of the MxWeb(™) suite of products from Media-X Systems Inc. ePrincipal provides the day-to-day data analysis that school administrators require, as well as the ability for school districts to view system-wide data and information from the six other mxweb modules.

Built-in reports

- Support for current and historical data
- Analysis by grade, class, course, strand
- Learning skills analysis and comments
- Student profile report
- Ontario elementary and secondary report card data analysis
- Data analysis from all other mxweb modules (eTeacher, eStudent, IEP-X, mVal, eWalk, iNotice)
- Adolescent student attitudes inventory (ADSI-E) from Weatherbee Consultants
- Analysis of bullying survey: R. Young Associates
- iNotice incident and achievement reports
- IEP data from report cards and IEP-X information

Browser/ Language support

- Available in English and French
- Windows and Macintosh browsers (IE Explorer, Netscape, Firefox)

User-defined reports

- Create and save honour roll reports for one or more grades with control over subjects and criteria
- Use standard or custom honour roll certificates for printing
- Create and save at-risk student reports for one or more grades with control over subjects and criteria

Exporting, data warehousing

- Data can be exported as .csv file or saved as SQL table
- Custom data export can be created to supplied specifications
- Integration with data warehousing projects available upon request

Data formats

- Built-in support for importing data from ePrincipal mobile data extractor to provide easy analysis of SASI, WinSchool, HSST (NYC), Trillium, eSIS, SAS, Maplewood and other student management systems
- Built-in support for Ontario report card data (elementary and secondary)
- Import template provides support for wide range of data types including state mandated standardized test results, EQAO data, etc.

Customization

- Custom data analysis reports can be developed for a one-time fee
- Intelligent reports can include graphs, charts, complex data manipulation, exporting, PDF printing, etc
