Notice and Report all Positive and Negative Student Behavior

iNotice® Encourages Positive Learning Skills, Citizenship and Community Involvement

iNotice®

Capture Incidents & Achievements

- Threats to student safety
- Signs of social isolation and bullying
- Reward great attitudes and action
- Track IEP students

Easy to Use

- Work across large school districts, schools or individual teachers
- Available in English and French

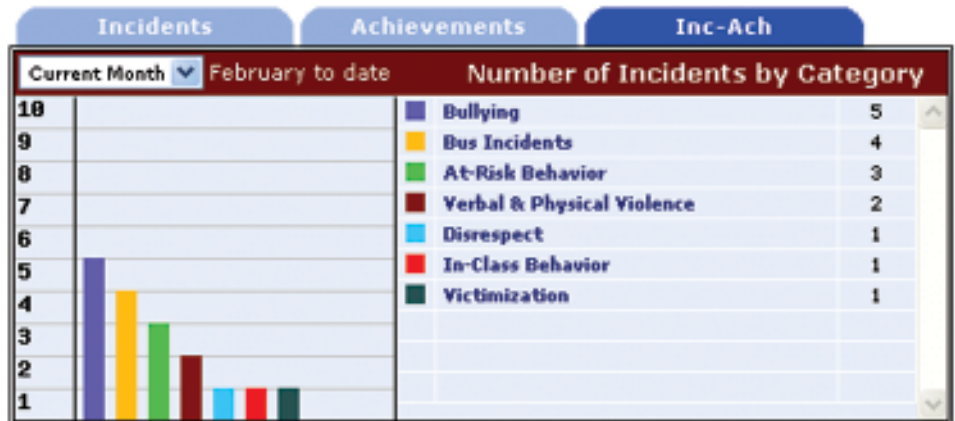

Flexibility

- Define categories, actions and location
- Control alert system which views schools' activities
- Get instant data views and take closer look at school situation

Record and Report

- Reporting, centralized data entry, analysis and feedback saves more meaningful data
- Record incidents using a handheld device through direct internet input or on paper forms

Track and monitor student behavior

Overview

iNotice is a web based software system that is part of the mxweb(TM) suite of products from Media-X Systems Inc. iNotice can work on its own, or with existing systems to allow greater flexibility in gathering and analyzing data. By using iNotice you can build safer schools by having information readily available from a variety of sources.

Set-up

- > Templates define incidents and achievements, descriptors, actions, locations, alert values, etc.
- > A single templates can be used by all schools in a district or each school can develop their own template
- > Custom forms and letters can be attached to templates
- > Student information provided through standard mxweb import from most student management systems
- > Available in English and French

Data entry

- > Notices can be recorded on handheld or through direct web entry
- > Wireless transfer available for different types of handhelds
- > Attach photos and/or voice memos to notices recorded on many handheld models
- > Desktop conduits available for handhelds connected through Windows or Mac desktop computers
- > Paper data entry forms can be printed for manual data entry

Alerts, follow-up, forms, letters

- > User configurable setting calculates individual student alerts based on total point accumulation
- > Notices can be printed to standard or custom forms or letters, or used to generate forms
- > Notices can be assigned to other personnel for follow-up action
- > Dashboard views show current day, week, month or custom date range with comparison of previous period
- > District administrators or superintendents can view data from multiple schools in real time

Report, data

- > Wide range of statistical reports built-in to system
- > Custom reports available for one-time charge
- > Data can be exported as .csv file or SQL table
- > Custom data export can be created upon request
- > Data can be used within other mxweb modules (ePrincipal, eTeacher)
