## The Marzano Standards Based Gradebook is a new Grading Solution from Media-X and Marzano Research

Unique to this Gradebook is the application of the Standards-Based Grading approach. This allows for the prediction of valid student achievement in specific areas.

- Easily track student learning goals and proficiency levels
- Crisp, Clean Layout and Easy to Use
- Designed for use on all mobile devices

### Forecast Student grades with the Marzano Gradebook's "Power Law" capability

A feature unique to the Marzano Gradebook, "Power Law" is utilized to represent how much a student has learned and will estimate how well this individual will learn in the future. This method provides a greater detail of information to the teacher than what a simple average will yield.

### Flexible approach supports traditional final grades

If your school does not follow the Standards-Based grading approach, do not fret! This Gradebook remains a powerful choice for all traditional grading needs as it is a fully encompassing program that will fit to your requirements.
